

### PURPOSE:

The intent and purpose of the *Dodge County, WI COVID-19 Weekly Report* is to turn real data tracked into a visible format for the community to stay informed on the current COVID-19 status in Dodge County.

### DISCLAIMER:

The data shown below are subject to change. We strive for transparency and accuracy in our data, and as individual cases are investigated by public health, there may be corrections to the status and details of cases that result in changes to this information. Some examples of corrections or updates that may lead to changes to our data, such as case and negative counts and deaths going up or down, include:

- Update or correction of case's address, resulting in a change to their location of residence to another county or state,
- Correction to laboratory result,
- Correction to a case's status from confirmed to unconfirmed (for example, if they were marked as confirmed because a blood test detecting antibodies was positive instead of a test detecting the virus causing COVID-19),
- De-duplication or merging and consolidation of case records,
- Update of case's demographic information from missing or unknown to complete information.

### Department of Health Services Announces Police and Fire are Eligible for COVID-19 Vaccine 1/11/2021

The Wisconsin Department of Health Services (DHS) announced today that **Police and Fire personnel will be eligible for the COVID-19 vaccine beginning January 18, 2021** which begins the first step into phase 1B for Wisconsin. Wisconsin has been vaccinating the 1A population since December 14, 2020 which includes frontline health care workers and residents of long-term care facilities including nursing homes and assisted living facilities.

There are 1098 entities fully registered and ready to provide COVID-19 vaccines in Wisconsin. Local Health Departments (LHD) will be leading the coordination for the vaccination of Police and Fire personnel, as well as EMS and unaffiliated health care providers in their jurisdictions. Local Health Departments will work in partnership with local vaccinators, including health care systems and pharmacies. To ensure vaccine access statewide, DHS will also work alongside LHDs in coordinating with police and fire associations.

### Broad availability of COVID-19 vaccines months away; Patience and diligence are essential

While some healthcare organizations in Dodge County have received or will shortly receive vaccines, it is important to remember that Center for Disease Control and Prevention guidelines dictate the limited number of vaccines be used first on frontline healthcare workers, followed by essential workers, and others in direct contact with COVID-19 positive individuals and the virus (still to be defined by state DHS) and people older than 75 years of age. Only those who meet CDC and state criteria for risk can receive the vaccine at this time.

For most Americans, this availability could still be months away, which means patience and diligence to public health guidelines will be crucial to limit further spread of the virus, hospitalizations, and even deaths.

While there may be much enthusiasm in our community to receive the vaccine, please know that only those who meet the CDC criteria for risk can receive it at this time. Your healthcare providers cannot add you to a waitlist or pre-schedule vaccination for future availability. We kindly ask that the public please not call their healthcare providers requesting the vaccine at this time, as high volume of calls makes it more difficult to address those patients with immediate needs.

## COVID-19 Testing Updates

### Wisconsin National Guard approaches one million COVID-19 tests collected

1/4/2021

Wisconsin National Guard specimen collection teams will break the one million mark last week for COVID-19 tests collected since April 2020.

Teams have collected a cumulative total of nearly 996,000 specimens at community-based testing sites and institutional-based testing missions. The Wisconsin National Guard's collection activities support the Wisconsin Department of Health Service's efforts to expand COVID-19 testing throughout the entire state.

**Dodge County:** A community-based testing site operates each Monday and Wednesday in Beaver Dam between Dec. 14 and Mar. 10 and has collected over 1,500 specimens as of Jan. 4. Since Dec 14, our collection numbers are head and shoulders above other similarly sized counties and near the totals for larger, urban counties like Milwaukee, Outagamie and Waukesha.

## COVID-19- COMMUNITY POSITIVE STATISTICS

Hospitalizations, Deaths, Recoveries

Statistics are calculated using total confirmed Community cases

% ever  
HOSPITALIZED

● HOSPITALIZED  
● NOT HOSPITALIZED

Weekly %  
HOSPITALIZED

● HOSPITALIZED  
● NOT HOSPITALIZED

**"Hospitalized"** means the person needed to be admitted to the hospital for medical care at some point in their illness. This does not include someone that was only seen in urgent care or the emergency department. The length of admission varies among cases: *at least one night or up to a month or longer.*

**Less than 1%** of those cases were put on mechanical ventilation to assist with breathing.

**11** patients with COVID-19 were admitted to the hospital this week because of their symptoms. Does not include DOC cases.

**334** cases are actively isolating at their homes and receive daily monitoring calls from Public Health staff. **Down 88 cases from last week.**

**7,950** cases are recovered: it has been 10 days since symptoms first appeared and they have been symptom-free for 24 hrs. **Up 321 cases from last week.**

**143** cases are deceased from the virus. **Up 1 confirmed case and 0 probable cases from last week.** (\*2 of the deaths are from the Department of Corrections)

## RECOVERY STATUS

● ACTIVE CASES- 5% ● RECOVERED- 94% ● DECEASED- < 1%

# COVID-19 Death Reporting

## Counting COVID-19 deaths:

1. Deaths must be reported by health care providers, medical examiners/coroners, and recorded by local health departments in order to be counted.

2. The medical examiner in the county of the death reviews all pertinent medical records and tests to determine the cause of death.

3. COVID-19 must be listed as a "cause of death" or "other significant condition" in order for it to be considered a COVID death

4. A death is counted in statistics once the death certificate is finalized and received by Dodge County Public Health. .

Hospitalized	75
Any Intensive Care	18
Intubated	13
Not Hospitalized	28
Unknown Hospitalization Status	34

Source: Public Health Analysis Visualization and Reporting (PHA VR) web portal.

## DEATHS BY SETTING

## COVID-19 Deaths by Age Group

### \*Probable

Deaths among probable cases are those that meet one of the following criteria:

1. A probable case of COVID-19 is reported to have died from causes related to COVID-19.

2. A death certificate that lists COVID-19 disease or SARS-CoV-2 as an underlying cause of death or a significant condition contributing to death is reported to DHS but WEDSS has no record of confirmatory laboratory evidence for SARS-CoV-2.

## COVID-19- COMMUNITY POSITIVE STATISTICS

EXCLUDES PERSONS UNDER CARE OF DEPARTMENT OF CORRECTIONS

### AGE RANGE OF POSITIVE INDIVIDUALS:

Jan 4- Jan 10, 2021

● New Confirmed Cases

## FACILITY-WIDE COVID-19 PUBLIC HEALTH INVESTIGATIONS / "OUTBREAKS"

### What types of facilities?:

- **Long-term care facilities** (nursing home, assisted living, CBRF),
- **Group housing facilities** (correctional facilities, homeless shelters, dormitories, group homes) ,
- **Health care facilities** (hospitals, clinics),
- **Workplace** (non-healthcare) settings (manufacturing and production, distribution, offices, and other indoor workplaces), and
- **Other settings** (adult or child daycare centers, restaurants, event spaces, and religious settings)

### How are these investigations initiated?:

A single confirmed case in a long-term care facility.  
Two or more confirmed cases in any other setting.

# 51

**Active Facility-wide investigations in Dodge County**

Detecting COVID-19 in a nursing facility

is an indicator that the nursing home is following proper notification procedures and working with public health experts to test and protect their residents and employees by using appropriate isolation and infection control practices. Proactive testing helps address outbreaks early on while they're easier to isolate and manage.

## COVID-19 STATISTICS: Weekly % Positive Rates

Line Key

% Positive Rate by Person

Daily % Positive Rate by Person

7 Day Average % Positive Rate by Person

Goal:

- <5%
- downward trajectory

## Calculations:

1) % Positive Rate By Person = Total Positive Tests ÷ Total Positive and Negative Labs

\*aka. "Rolling average" - more accurate

2) Daily % Positive rate By Person = # Positive labs in last 24 hrs ÷ total labs resulted in last 24 hrs

\*fluctuations occur more frequently based on how long different labs take to produce test results and the LPHD's resources to manually log positive results.

3) 7-day average = Total Positive tests from the week ÷ total tests from the week

\*to smooth out any day-to-day fluctuations and track overall trends

Rolling % Positive Rate By Person Trajectory

Of Concern

Proceed with Caution

Good

The percent positive is exactly what it sounds like: the percentage of all coronavirus tests performed per person that are actually positive, or:  $(\text{positive cases}) / (\text{total positive} + \text{negative persons}) \times 100\%$ . Percent positive by person only includes each person once across the duration of the pandemic. The percent positive (sometimes called the "percent positive rate" or "positivity rate") helps public health officials answer questions such as:

- What is the current level of SARS-CoV-2 (coronavirus) transmission in the community?
- Are we doing enough testing for the amount of people who are getting infected?

## Harvard Model: Key Metrics for COVID Suppression

### Introduction:

The Harvard Global Health Institute and Harvard's Edmond J. Safra Center for Ethics have been working with a network of research and policy organizations to achieve convergence around recommendations for core metrics to be used to evaluate the status of COVID response and key performance indicators to evaluate how well particular tools of response are being deployed. Putting it in a rate per 100,000 population allows you to compare it to other counties with varying populations.

Purpose: A unified approach for suppressing COVID-19 with common metrics to help anticipate and get ahead of the virus rather than reacting to uncontrolled community spread.

### COVID Risk Level Map:

Risk Level: GREEN	Risk Level: YELLOW	Risk Level: ORANGE	Risk Level: RED
Less than ONE case PER 100,000 People	1-9 cases PER 100,000 People	10-24 cases PER 100,000 People	25+ cases PER 100,000 People
On track for containment	Community Spread	Accelerated Spread	Tipping point
Monitor with viral testing and contact tracing program	Rigorous test and trace programs advised	Stay-at-home orders and/or rigorous test and trace programs advised	Stay-at-home orders necessary

*The rate of positive cases per 100,000 population is based on community positive cases only using a 2020 preliminary population for Dodge County of 90,005. No department of corrections positive cases are factored into this model as we feel they do not accurately represent the community spread of the virus in Dodge County.*

### Harvard Model: Is reported as a 7 day average

January 4 - January 10, 2021

# 37.14

*The 7-day average of daily new cases per 100,000 people.*

*At the **red level**, jurisdictions have reached a tipping point for uncontrolled spread and will require the use of stay-at-home orders and/or advisories to mitigate the disease.*

Weekly Average of New Cases per 100,000 population over time

## DODGE COUNTY SAFE RESTART

**WHAT IS IT?:** A measured, phased-in approach that utilizes data-driven benchmark criteria and aligns with federal and state metrics has been developed to guide Dodge County decision making.

**Effective September 18, Dodge County will transition back to *Phase ONE* of the Dodge County Safe Restart:**

**READ THE FULL PLAN:** Visit our website under the "Coronavirus Information" > Dodge County Safe Restart tab and click the link: "Dodge County Safe Restart Guidelines and Recommendations for Action" to read the full plan.

- Businesses should continue using the general best practice guidelines from the Wisconsin Economic Development Corporation (WEDC) and any sector specific recommendations that apply to the work being done. If your sector is not included the CDC has additional resources for sectors/organizations to reference.
- Limit capacity within non-essential businesses, bars, restaurants and organizations to **25% or less**.
- Events held outdoors should allow for all people to maintain 6 feet physical distance (36 square feet per person) from others.
- People age 65 or older and those who are medically vulnerable should continue to limit travel and remain at home as much as possible.
- Support online education/remote work options as able.
- Encourage curbside pick-up to reduce in-store traffic and long lines.
- If community members choose to gather socially, private indoor social gatherings should be limited to **10 people or less** with physical distancing.
- Encourage masking for both staff and consumers.

## Weekly Benchmark Criteria Scorecard:

Updated 01/08/2021

**Date:**  
January 8, 2021

**Current Phase:**  
Phase One

### Explanation:

**Cases:** steady upward trajectory greater than 10% positivity rate.

**Care:** Local hospitals are reporting they have moved into crisis standards.

**Tracing:** Our Contact Tracing Team is attempting to reach greater than 50% of new positive cases within 24 hrs and household contacts within 48 hrs. Attempting to reach non-household contacts within 48hrs may be delayed.

We recommend continuing following our guidance, to include: physical distancing, wearing a mask, increased handwashing, and avoiding gatherings

## Phase: ONE

### Dodge County Benchmark Criteria

Indicator	Metric	Status
Cases	Downward trajectory of positive cases of COVID-19 as a percentage of total tests.	✓
Testing	Testing availability for all residents with COVID-like symptoms, with priority toward vulnerable populations.	✓
Care	Hospitals have ability to treat all patients requiring hospitalization without resorting to crisis standards.	✓
PPE	Adequate PPE available to healthcare personnel.	✓
Tracing	Every resident who tests positive for COVID-19 is interviewed within 24 hours of test results. COVID positive contacts are interviewed within 48 hours of test results.	✓

Excellent

Proceed with Caution

Of Concern

# Should I get tested?

Anyone with symptoms of COVID-19 or who has been exposed to COVID-19 should get tested.

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

If you think you need to get tested:

- Contact your doctor to ask if your primary health care clinic is providing testing.
- Find a local community testing site. Testing at these sites are provided at no cost. Some locations may require a doctor's note or appointment to receive a test.

## Where to find community COVID testing:

**To find a testing site near you visit:**

<https://www.dhs.wisconsin.gov/covid-19/community-testing.htm>

### Ongoing Community Sites Near Dodge County:

#### **Vacant building--Beaver Dam, WI (Walk-in)**

1701 N. Spring St, Beaver Dam, WI 53916

Mondays and Wednesdays 10:00am- 5:00pm ([thru 3/10/21](#)).

#### **Fond du Lac County Fair Grounds--Fond du Lac, WI (Drive-thru)**

520 Fond du Lac Ave, Fond du Lac, WI 54935

Thursday 10:00am- 6:00pm ([thru 3/4/21](#))

#### **Cambria Fire Department--Cambria, WI (Drive-thru)**
